Contents for Volume 143

Number 1, 8 March 1990

HOATH, S. B., Considerations on the Role of Surface Tension and Epidermal Growth Factor in the Mechanism of Integumental Pattern Formation 1

SMITH, D. P. B. and BULLOCK, T. H., Model Nerve Net can Produce Rectilinear, Non-diffuse Propagation as Seen in the Skin Plexus of Sea Urchins 15

MAYNARD SMITH, J., Models of a Dual Inheritance System . . . 41

SUBRAMANIAM, B. and CLAUDIUS, J. S., Effect of Intravenous Drug Administration Mode on Drug Distribution in a Tumor Slab: A Finite Fourier Transform Analysis 55

LIMA, S. L., Evolutionarily Stable Antipredator Behavior among Isolated Foragers: On the Consequences of Successful Escape 77

BANERJEE, S., SIBBALD, P. R. and MAZE, J., Quantifying the Dynamics of Order and Organization in Biological Systems 91

BEUCHAT, C. A., Metabolism and the Scaling of Urine Concentrating Ability in Mammals: Resolution of a Paradox? 113

SLOMINSKI, A. and PAUS, R., Are L-tyrosine and L-dopa Hormone-like Bioregulators? 123

LETTER TO THE EDITOR

IRVINE, D. H., Objectives, Assumptions and Results of Metabolic Control Theory and Biochemical Systems Theory 139

Number 2, 22 March 1990

ORPWOOD, R. D., Mechanisms of Association Learning in the Post-synaptic Neurone 145

ALBE, K. R., BUTLER, M. H. and WRIGHT, B. E., Cellular Concentrations of Enzymes and Their Substrates 163

JAMON, M., A Reassessment of the Random Hypothesis in the Ocean Migration of Pacific Salmon 197

BRAY, D., Intracellular Signalling as a Parallel Distributed Process . . 215

LE GUYADER, H. and HYVER, C., Modelling of the Duplication of Cortical Units along a Kinety of *Paramecium* using Reaction-diffusion Equations 233

VARÓN, R., HAVSTEEN, B. H., GARCIA, M., VALERO, E. and GARCIA CÁNOVAS, F., Derivation of the Transient Phase Equations of Enzyme Mechanisms from those of other Systems 251

CRAWFORD, V. P., On the Definition of an Evolutionarily Stable Strategy in the "Playing the Field" Model 269

DILLON, P. F. and CLARK, J. F., The Theory of Diazymes and Functional Coupling of Pyruvate Kinase and Creatine Kinase 275

ERRATUM 285

Number 3, 5 April 1990

SCHÖNIGER, M., HOFACKER, G. L. and BORSTNIK, B., Stochastic Traits of Molecular Evolution—Acceptance of Point Mutations in Native Actin Genes 287

ARQUÈS, D. G. and MICHEL, C. J., Periodicities in Coding and Noncoding Regions of the Genes 307

RICE, S. H., A Geometric Model for the Evolution of Development . 319

WEINAND, R. G., Somatic Mutation, Affinity Maturation and the Antibody Repertoire: A Computer Model 343

VAN DER STEEN, W. J., Concepts in Biology: A Survey of Practical Methodological Principles 383

HEMELRIJK, C. K., A Matrix Partial Correlation Test Used in Investigations of Reciprocity and Other Social Interaction Patterns at Group Level 405

LETTERS TO THE EDITOR

SUGRUE, P. and HOLWILL, M. E. J., Changes in Beat Frequency of Reactivated Flagella of *Crithidia oncopelti* Inhibited with Vanadate . 421

ENRIGHT, J. T., Comparisons Between Periodograms and Spectral Analysis: Don't Expect Apples to Taste Like Oranges 425

Number 4, 19 April 1990

DONCASTER, C. P., Non-parametric Estimates of Interaction from Radio-tracking Data 431

WANG, Z.-X., Some Applications of Statistical Mechanics in Enzymology 1. Elementary Principle 445

WANG, Z.-X. and KIHARA, H., Some Applications of Statistical Mechanics in Enzymology 2. Statistical Mechanical Explanation on Allosteric Enzyme Models 455

WANG, Z.-X., Some Applications of Statistical Mechanics in Enzymology 3. Effects of Nonspecific Inhibitors and Activators on Enzyme Reaction 465

WANG, Z.-X., Some Applications of Statistical Mechanics in Enzymology 4. Effects of pH on Enzyme 473

VOLKOV, S. N., Conformational Transition Dynamics and the Mechanism of Long-range Effects in DNA 485

POLLATSCHEK, M. A. and NAHIR, A. M., A Mathematical Model of Osteoarthosis 497

WEISBUCH, G., A Shape Space Approach to the Dynamics of the Immune System 507

HERENDEEN, R., System-level Indicators in Dynamic Ecosystems: Comparison Based on Energy and Nutrient Flows 523

JAMES, W. H., The Hypothesized Hormonal Control of Human Sex Ratio at Birth—an Update 555

BROWN, R. D., The Proton Channel Blocking Agent Omeprazole Is an Inhibitor of the Thiamin Shuttle 565

Index to Volume 143

Actin genes, acceptance of point mutations in; stochastic traits of molecular evolution, 287
Affinity maturation, somatic mutation and the antibody repertoire; a computer model, 343
ALBE, K. R., BUTLER, M. H. and WRIGHT, B. E., Cellular concentrations of enzymes and their substrates, 163
Allosteric enzyme models, statistical mechanical explanation on, 455
Antibody repertoire, somatic mutation and affinity maturation; a computer model, 343
Antipredator behaviour, evolutionarily stable, among isolated foragers; consequences of successful escape, 77
ARQUÈS, D. G. and MICHEL, C. J., Periodicities in coding and noncoding regions of the genes, 307
Association learning mechanisms in the post-synaptic neurone, 145

BANERJEE, S., SIBBALD, P. R. and MAZE, J., Quantifying the dynamics of order and organization in biological systems, 91
Beat frequency changes for reactivated flagella of *Crithidia oncopelti* inhibited with vanadate (letter), 421
BEUCHAT, C. A., Metabolism and the scaling of urine concentrating ability in mammals: resolution of a paradox?, 113
Biochemical systems theory, objectives, assumptions and results of metabolic control theory and (letter), 139
Biological systems, quantifying the dynamics of order and organization in, 91
Birth, hormonal control of human sex ratio at; an update, 555
BORSTNIK, B. (see SCHÖNIGER, M.), 287
BRAY, D., Intracellular signalling as a parallel distributed process, 215
BROWN, D. R., The proton channel blocking agent omeprazole is an inhibitor of the thiamine shuttle, 565
BULLOCK, T. H. (see SMITH, D. P. B.), 15
BUTLER, M. H. (see ALBE, K. R.), 163

CÁNOVAS, F. G. (see VARÓN, R.), 251
Cellular concentrations of enzymes and their substrates, 163
CLARK, J. F. (see DILLON, P. F.), 275
CLAUDIUS, J. S. (see SUBRAMANIAM, B.), 55
Coding and noncoding regions of the genes, periodicities in, 307
Concepts in biology: a survey of practical methodological principles, 383
Conformational transition dynamics and the mechanism of long-range effects in DNA, 485
Cortical units, reaction-diffusion equation modelling of duplication of, along a kinety of *Paramecium*, 233
CRAWFORD, V. P., On the definition of an evolutionarily stable strategy in the "Playing the Field" model, 269
Creatine kinase, the theory of diazymes and functional coupling of pyruvate kinase and, 275
Crithida oncopelti, changes in beat frequency of reactivated flagella inhibited with vanadate (letter), 421

Development, a geometric model for the evolution of, 319
Diazymes and functional coupling of pyruvate kinase and creatine kinase, theory of, 275
DILLON, P. F. and CLARK, J. F., The theory of diazymes and functional coupling of pyruvate kinase and creatine kinase, 275
DNA, conformational transition dynamics and the mechanism of long-range effects in, 485

DONCASTER, C. P., Non-parametric estimates of interaction from radio-tracking data, 431
L-dopa and L-tyrosine: are they hormone-like bioregulators?, 123
Drug distribution in a tumor slab, effect of intravenous drug administration mode on; finite Fourier transform analysis, 55
Dual inheritance system, models of, 41
Dynamic ecosystems, system-level indicators in; comparison based on energy and nutrient flows, 523
Dynamics, conformational transition, and the mechanics of long-range effects in DNA, 485
Dynamics of the immune system, a shape space approach to, 507
Dynamics of order and organization in biological systems, quantifying of, 91

Ecosystems, dynamic, system-level indicators in; comparison based on energy and nutrient flows, 523
Energy and nutrient flows; system-level indicators in dynamic ecosystems, 523
ENRIGHT, J. T., Comparisons between periodograms and spectral analysis: don't expect apples to taste like oranges (letter), 425
Enzyme, effect of pH on, 473
Enzyme mechanisms, derivation of the transient phase equations from those of other systems, 251
Enzyme reaction, effects of nonspecific inhibitors and activators on, 465
Enzymes and their substrates, cellular concentrations of, 163
Enzymology, some applications of statistical mechanics in, 445, 455, 465, 473
Epidermal growth factor, role in mechanism of integumental pattern formation, 1
Evolution of development, a geometric model for, 319
Evolution, molecular, stochastic traits of; acceptance of point mutations in native actin genes, 287
Evolutionarily stable antipredator behaviour among isolated foragers: on the consequences of successful escape, 77
Evolutionarily stable strategy in the "Playing the Field" model, on the definition of, 269

Flagella, reactivated, of *Crithidia oncopelti* inhibited with vanadate, changes in beat frequency of (letter), 421
Foragers, isolated, evolutionarily stable antipredator behaviour among; consequences of successful escape, 77
Functional coupling of pyruvate kinase and creatine kinase, the theory of diazymes and, 275

GARCIA, M. (see VARÓN, R.), 251
Genes, actin, acceptance of point mutations in; stochastic traits of molecular evolution, 287
Genes, periodicities in coding and noncoding regions of, 307
Growth factor, epidermal; role in mechanism of integumental formation, 1

HAVSTEEN, B. H. (see VARÓN, R.), 251
HEMELRIJK, C. K., A matrix partial correlation test used in investigations of reciprocity and other social interaction patterns at group level, 405
HERENDEEN, R., System-level indicators in dynamic ecosystems: comparison based on energy and nutrient flows, 523
HOATH, S. B., Considerations on the role of surface tension and epidermal growth factor in the mechanism of integumental pattern formation, 1
HOFACKER, G. L. (see SCHÖNIGER, M.), 287
HOLWILL, M. E. J. (see SUGRUE, P.), 421
Hormonal control of human sex ratio at birth—an update, 555
Hormone-like bioregulators; L-tyrosine and L-dopa, 123
HYVER, C. (see LE GUYADER, H.), 233

Immune system, a shape space approach to the dynamics of, 507
Inheritance, dual, system, model of, 41
Integumental pattern formation, the role of surface tension and epidermal growth factor in the mechanism of 1
Interaction, non-parametric estimates of, from radio-tracking data, 431
Interaction patterns, social, at group level, a matrix partial correlation test used in investigations of, 405
Intracellular signalling as a parallel distributed process, 215
IRVINE, D. H., Objectives, assumptions and results of metabolic control theory and biochemical systems theory (letter), 139

JAMES, W. H., The hypothesized hormonal control of human sex ratio at birth—an update, 555
JAMON, M., A reassessment of the random hypothesis in the ocean migration of Pacific salmon, 197

KIHARA, H. (see WANG, Z.-X.), 455

Learning, association, in post-synaptic neurones, mechanisms of, 145
LE GUYADER, H. and HYVER, C., Modelling of the duplication of cortical units along a kinety of *Paramecium* using reaction-diffusion equations, 233
LIMA, S. L., Evolutionarily stable antipredator behaviour among isolated foragers: on the consequences of successful escape, 77
Long-range effects in DNA, conformational transition dynamics and the mechanics of, 485

Mammals, metabolism and the scaling of urine concentrating ability in; resolution of a paradox?, 113
Matrix partial correlation test used in investigations of reciprocity and other social interaction patterns at group level, 405
MAYNARD SMITH, J., Models of a dual inheritance system, 41
MAZE, J. (see BANERJEE, S.), 91
Metabolic control theory and biochemical systems theory; objectives, assumptions and results (letter), 139
Metabolism and the scaling of urine concentrating ability in mammals; resolution of a paradox?, 113
Methodological principles, practical, a survey; concepts in biology, 383
MICHEL, C. J. (see ARQUÈS, D. G.), 307
Migration, ocean, of Pacific salmon, a reassessment of the random hypothesis in, 197
Mutations, point, in native actin genes; stochastic traits of molecular evolution, 287
Mutation, somatic, affinity maturation and the antibody repertoire; a computer model, 343

NAHIR, A. M. (see POLLATSCHEK, M. A.), 497
Nerve net model can produce rectilinear, non-diffuse propagation as seen in the skin plexus of sea urchins, 15
Neurones, post-synaptic, mechanisms of association learning in, 145

Omeprazole is an inhibitor of the thiamin shuttle, 565
Order and organization in biological systems, quantifying the dynamics of, 91
ORPWOOD, R. D., Mechanisms of association learning in the post-synaptic neurone, 145
Osteoarthosis, a mathematical model of, 497

Paramecium, modelling of the duplication of cortical units along a kinety of, using reaction-diffusion equations, 233

Pattern formation, integumental, the role of surface tension and epidermal growth factor in the mechanism of, 1
PAUS, R. (see SLOMINSKI, A.), 123
Periodograms and spectral analysis, comparisons between; don't expect apples to taste like oranges (letter), 425
pH, effects on enzyme, 471
"Playing the Field" model, on the definition of an evolutionarily stable strategy in, 269
POLLATSCHEK, M. A. and NAHIR, A. M., A mathematical model of osteoarthosis, 497
Proton channel blocking agent omeprazole is an inhibitor of the thiamin shuttle, 565
Pyruvate kinase and creating kinase, the theory of diazymes and function coupling of, 275

Radio-tracking data, non-parametric estimates of interaction from, 431
Reciprocity and other social interaction patterns at group level, a matrix partial correlation test used in investigations of, 405
RICE, S. H., A geometric model for the evolution of development, 319

Salmon, Pacific, a reassessment of the random hypothesis in the ocean migration of, 197
Scaling of urine concentrating ability, and metabolism, in mammals; resolution of a paradox?, 113
SCHÖNIGER, M., HOGACKER, G. L. and BORSTNIK, B., Stochastic traits of molecular evolution—acceptance of point mutations in native actin genes, 287
Sea urchins, model nerve net can produce rectilinear, non-diffuse propagation as seen in the skin plexus of, 15
Sex ratio, human, horminal control of, at birth—an update, 555
Shape space approach to the dynamics of the immune system, 507
Signalling, intracellular, as a parallel distributed process, 215
Skin plexus of sea urchins, model nerve net can produce rectilinear, non-diffuse propagation in, 15
SLOMINSKI, A. and PAUS, R., Are L-tyrosine and L-dopa hormine-like bioregulators?, 123
SMITH, D. P. B. and BULLOCK, T. H., Model nerve net can produce rectilinear, non-diffuse propagation as seen in the skin plexus of sea urchins, 15
Social interaction patterns at group level, a matrix partial correlation test used in investigations of, 405
Somatic mutation, affinity maturation and the antibody repertoire; a computer model, 343
Spectral analysis and periodograms, comparisons between; don't expect apples to taste like oranges (letter), 425
Statistical mechanics in enzymology, some applications of, 445, 455, 465, 473
Stochastic traits of molecular evolution—acceptance of point mutations in native actin genes, 287
SIBBALD, P. R. (see BANERJEE. S.), 91
